M11-360 Degree Needle Bar Rotary Template Machine

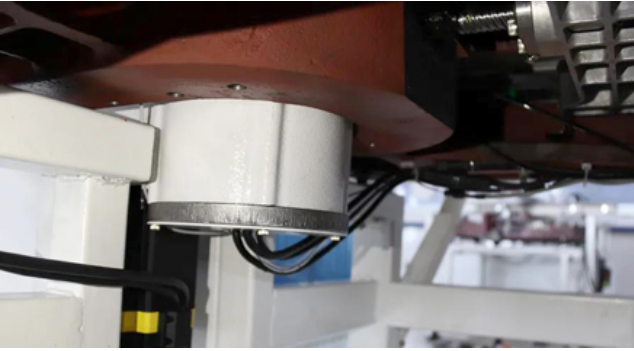

Template machine series

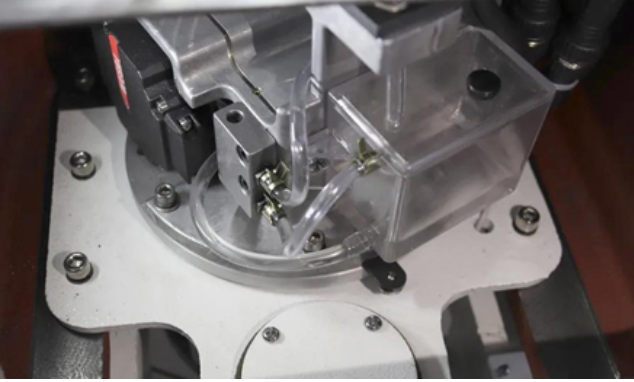

1. **360-degree rotating needle bar, no reverse stitching, 100% ensure beautiful stitches, and** further reduce the probability of thread breakage, dislocation of upper and lower sewing materials, and down jacket running down.
2. The worm gear and worm drive control the rotation of the needle bar, and the angle of rotation is as precise as a mechanical watch.

3. Flexible intermediate presser foot, easy and smooth over-step sewing.
4. The template operation adopts screw drive, **with high precision and low sound** .
5. Optional roller type thread clamping device, **for thick material sewing, the thread take-up is more stable and reliable** .

6. Built-in conductive slip ring to avoid the risk of oil leakage and mechanical collision.
7. Independent external oil storage device, **more convenient to refuel** .

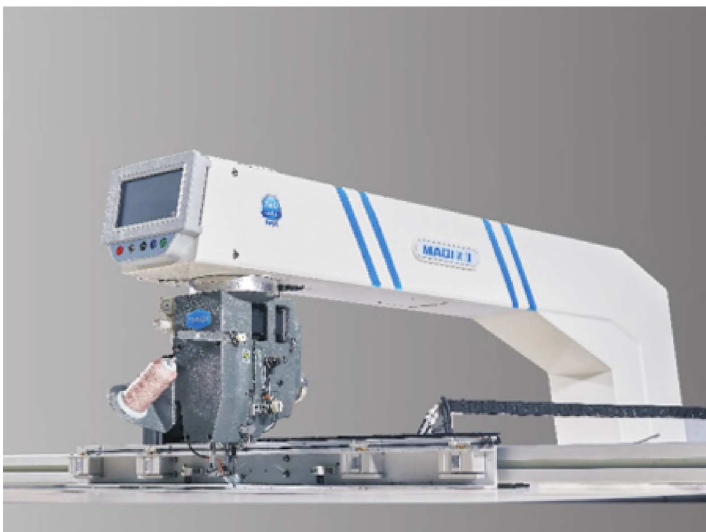

8. **Super large intelligent sewing table (horizontal 1300mmX vertical Y900mm)** , which has a wide range of applications. It is widely used in all kinds of garments (such as down jackets, cotton-padded clothes, suits, jackets, work clothes, shirts, etc.), as well as leather goods, shoes and hats, household items, etc., and is especially suitable for the processing of products with high requirements on stitches.
